

Connect your people, places, and spaces

Appspace and IAdea help you create a work experience employees love. No matter where your people are or how they work, Appspace and IAdea can keep them connected, engaged, and productive.

Appspace partners with IAdea, running on its enterprise-grade devices for a workplace experience that's focused on maximizing space usage, enhancing employee wellbeing and safety, and turbocharging productivity.

Workplace Management

Navigate the workplace, collaborate with colleagues, and more

Make navigating the workplace easy with Appspace interactive wayfinding and maps, presented on an IDea high-precision interactive kiosk (XDS-2288-APP). The interactive directory helps you connect with the people you need. Data collected from check-ins and reservations inform data-based decisions to fine-tune space layouts.

Put people in control with interactive wayfinding

Anyone who enters your office can confidently navigate it independently with IDea 22" self-service kiosks (XDS-2288-APP). Whether they're located in the lobby or in a few places throughout your space, kiosks give people easy access to the information they need.

Check-in guests and visitors safely and easily

Schedule, plan, and track all office visitor activity from a simple tool. Automate visitor registration and notifications to hosts with a self-service IDea 10" kiosk (WRP-1000-APP) in reception areas to reduce front-desk workload. A QR code can also be scanned for mobile check-in.

Reserve spaces easily

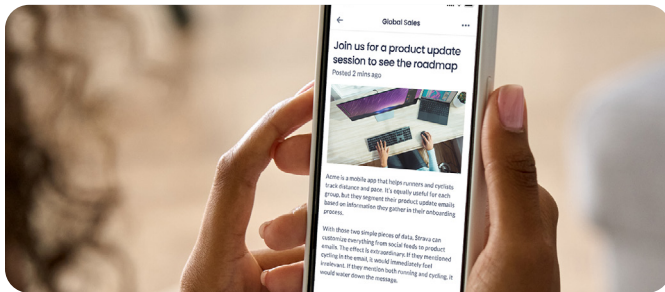

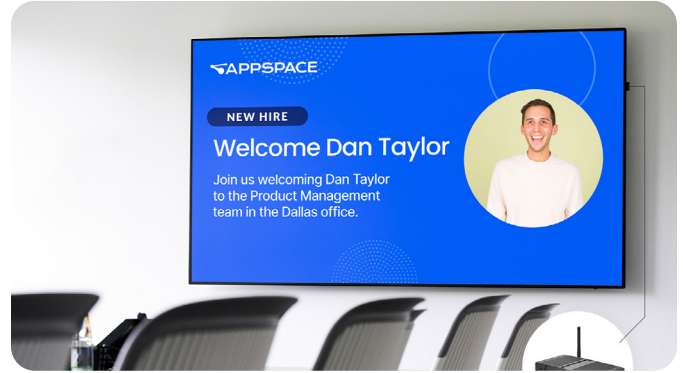

Start meetings off right. With just a few taps, book for now or schedule a meeting for later on any touch-interactive booking panel or kiosk. Integrated HID or NFC readers allow instant check-ins with the tap of a workplace-issued ID card with an IDea 10" Room Booking Panel (WRP-1000-APP).

Workplace Communication

Stay on brand with digital signage

Keep teams informed and engaged by sharing the latest announcements, reports, social activities, and more on crystal-clear displays strategically placed throughout the workplace. Publish content using Appspace cloud-based tools and view it in the native Appspace app running on IDea 22" all-in-one displays (XDS-2285-APP) or a 4K media player (XMP-8552-APP).

Reach team members anytime, anywhere

The Appspace platform ensures that communications – from alerts to birthday greetings – always reach the right person.

Make sure broadcasts and alerts are seen

Send alerts and other messaging across multiple channels at once, including digital signage, mobile, and more.

Why Appspace + IDea?

-  Secure & reliable
-  Easy to activate
-  Standardize globally
-  Fast & familiar procurement
-  RTO compliance
-  Exceptional support
